

Executive Business Report

Field	Details
Management Dashboard	Operational Insights Platform
Architecture	Microsoft Fabric Lakehouse Unified Analytics
Data Scope	6 Regional Store Locations Across Consolidated Enterprise Operations

1. Business Overview

This enterprise analytics report provides high-level dashboard oversight derived from consolidated operational metrics across all core regional brick-and-mortar storefronts.

Metric	Value
Total Revenue	₹25,00,000
Total Orders	50,000
Total Customers	18,500
Stores Operating	6
Products Sold	35
Staff Members	42

2. Revenue Performance

Revenue Contribution by Store Location

Store Location	Gross Revenue
Ghansoli	₹5,20,000
Belapur	₹4,80,000
Vashi	₹4,30,000
Nerul	₹4,10,000
Airoli	₹3,50,000
Panvel	₹3,10,000

Key Finding — Geographic Trends:

Ghansoli acts as the enterprise top revenue generator. Conversely, the Panvel regional hub reflects significant revenue variance and has been flagged for immediate corporate performance improvement initiatives.

Sales Trend Analysis & Peak Revenue Windows

Peak Operating Window	Hourly Sales Revenue
12:00 PM	₹38,400
1:00 PM	₹42,800
7:00 PM	₹52,100
8:00 PM	₹49,500

Key Finding — Demand Seasonality:

Compressed lunchtime and dinner-rush windows are highly cyclical, accounting for approximately 60% of absolute total pipeline sales.

3. Product Portfolio Performance

Top Product Volumes & Line Item Revenue

Product Name	Quantity Sold (Units)	Attributed Revenue
Margherita Pizza	15,000	₹4,50,000
Garlic Bread	12,500	₹2,20,000
Coke	10,200	N/A
Farmhouse Pizza	8,700	₹3,80,000
Pasta Alfredo	6,500	N/A

Segment Revenue by Product Category

Product Category Segment	Category Gross Revenue
Pizza	₹18,00,000
Beverages	₹3,20,000
Sides	₹2,30,000
Desserts	₹1,50,000

Key Finding — Portfolio Structure:

Core Pizza offerings dictate portfolio performance, single-handedly capturing over 70% of total company-wide revenue.

4. Customer & Payment Channel Analytics

Demographic Value & Order Baselines

Average Order Value (AOV): ₹500

New Customer Acquisitions: 13,000 unique users registered

Loyal Base Matrix: 5,500 active repeat clients

Customer Lifetime Value (CLV) Tiers

Customer Segment Classification	Mean Estimated CLV
Premium Tiers	₹18,500
Regular Tiers	₹8,200
Occasional Tiers	₹2,300

Key Finding — Value Density:

A tight core consumer cohort comprising just 30% of total active accounts fuels nearly 65% of absolute business revenue.

Payment Channel Distribution Split

Transaction Modality	Completed Orders Volume
UPI (Unified Payments Interface)	28,000
Card Platforms (Credit/Debit)	12,000
Cash Operations	10,000

Key Finding — Gateway Infrastructure:

UPI is established as the predominant choice at point-of-sale terminals, managing a definitive 56% market share of active orders.

5. Labor & Supply Chain Operations

Staff Sales Productivity Leaders

Frontline Operator ID	Attributed Store Sales Generated
Staff-001	₹5,20,000

Frontline Operator ID	Attributed Store Sales Generated
Staff-002	₹4,80,000
Staff-003	₹4,50,000

Supply Chain Velocity & Exception Logistics

Fast-Moving Lines (High Consumption Volumes): Cheese (8,000 units), Dough (7,500 units), Soft Drinks (6,200 units)

SKU Description	Available Stock Count	Reorder Safe Threshold
Cheese	300	500
Coke	150	300
Tomato Sauce	120	250

CRITICAL OPERATIONAL ALERT — Supply Chain Breaches: Current raw stock balances for Cheese and Coke have fallen below mandatory minimum safety buffers. Emergency warehouse replenishment cycles are required immediately to clear localized store shortfalls.

6. Market Basket Affinities & Strategic Recommendations

Cross-Product Purchase Probabilities

Anchor Item (A)	Paired Sub-Item (B)	Joint Attachment Rate
Pizza	Coke	68%
Pizza	Garlic Bread	54%
Pasta	Coke	42%

Strategic Executive Action Plan

- Menu Optimization Plan: Standardize system bundles integrating complementary items (Pizza + Coke) to secure automated checkout expansion.
- Dynamic Cross-Selling Campaigns: Launch higher value multi-buy combos (Pizza + Garlic Bread Meal Deals) at points of sale to enhance average order check size.
- Off-Peak Ticket Acceleration: Implement promotional dynamic incentives during historical low-activity afternoon blocks to distribute incoming orders evenly and balance capacity.
- Logistics Buffer Expansion: Increase local warehouse floors and safety log allocations for top crucial lines including bulk Cheese and Dough variants.
- Targeted Loyalty Ecosystems: Introduce structured reward plans and engagement benchmarks centered on converting mid-level customer segments into high-tier assets.

6. Operational Standard Scaling: Standardize and transfer the specific labor models and customer care practices of the top Ghansoli team to lagging regional spaces like Panvel.

7. Data Architecture & Enterprise Infrastructure

The implementation of the Microsoft Fabric Lakehouse ecosystem successfully resolved problems with decentralized store logs by engineering a centralized enterprise analytical core. This framework empowers operations with audited, historical clarity to manage regional transactions, user profiles, logistics, internal workforces, and core financial key performance indicators through a trusted and unified corporate single source of truth.
